WORK EXPERIENCE

Royal London Equity Release   Sep. 2023 – Present
Web Developer   *Remote*

- Engineered core React + Typescript components for the **Broker Portal**, optimizing performance, scalability, and maintainability through modular design and comprehensive testing serving **30,000 DAU**.
- Work collaboratively within an Agile framework to design and deploy financial workflows driving a **43.6%** increase in processing efficiency.
- Led accessibility compliance across multiple feature releases, expanding usability for all customer segments.
- Built and maintained end-to-end test suites, comprehensive component testing and leveraged Sentry to monitor and proactively resolve production incidents.

Nottingham Trent Student Union   Sep. 2022 – Sep. 2023
Web Developer   *Nottingham*

- Build, style, and ship high-quality websites and digital experiences for multiple stakeholders within the student union, effectively aligning design and functionality requirements to meet the diverse needs of the organization.
- Developing responsive modular HTML email templates, reaching 11,000+ users ensuring a high level of reliability across different devices and browsers.

This is DMG   May 2021 – Feb 2022
Front-end developer   *Remote*

- Transformed stakeholder requirements into scalable, reusable digital solutions by seamlessly integrating RESTful APIs, and maintaining comprehensive technical documentation.
- Build performant, headless CMS-powered websites for high-traffic client campaigns with strong SEO and UX focus.

The Starter Labs   Sep 2020 – May 2021
Developer   *Remote*

- Leading the establishment of an in-house web department at Starter Labs, streamlining project pipelines and delivering **13 projects** on time aligning with stakeholder requirements and prioritizing client satisfaction.
